AMA Group Unveils the New Standard in Heavy Vehicle Repairs at Wales Adelaide

AMA Group have launched their newest addition to their national network of Heavy Vehicle Repairs in Adelaide, with a re-brand and upgraded facility.

“Wales Heavy Vehicle Repairs”, formerly All Transport Crash Repairs, have moved into a state-of-the-art heavy vehicle repair facility located at 80-92 Grand Junction Rd Kilburn South Australia. This modern, extremely well-equipped heavy vehicle repair centre provides world’s best practise in heavy vehicle repairs to its existing client base of over 35 years, and with an undercover footprint of over 7,000m² and hardstand area of 17,000m², provides plenty of capacity to service the needs of all South Australia’s heavy transport repair requirements into the future.

Executive General Manager, Darren Wales said: “It is an honour to be a part of bringing this high-tech, well-equipped workshop together with quality of workmanship and good old-fashioned service. It is great that we can provide a state-of-the-art workshop with world class equipment and facilities, but without the actual tradespeople that perform the works, we have nothing”.

Boasting two full sized, downdraught spray-booth baking ovens, preparation walls, pressurised paint formulation rooms, two Josam Chassis Laser Alignment systems, 20m dedicated fibreglass booth, a 10 tonne overhead crane and a customer experience lounge leading the way in heavy motor repairs, Wales Heavy Vehicle Repairs Adelaide has set themselves up to be the major repair provider for all of South Australia, now and into the future.

“Our current throughput capacity of 20 vehicles per week can be expanded up to 30-35 vehicles per week in the not-to-distant future” says Mr. Wales. “With our proven processes and continuous improvement approach, our new facility in Kilburn can provide and expand on what All Transport Crash repairs has set as a base foundation - to provide the highest quality repairs in a safe, timely, efficient manner.

“One thing is for certain. This newest facility in providing quality, safe repairs which goes hand in hand with the Wales name in Heavy Vehicle Repairs, is setting themselves up not only for now, but well into the future.”

The team officially opened the site on Wednesday 29th November, welcoming customers, suppliers, and media to the site.
